

1. Executive Audit: Analysis of Your HosterPK Order Link

Critical Finding on Your Active Order Cart:
The URL you provided (/order/config/index/vps-hosting/?group_id=1026&pricing_id=300) belongs to HosterPK's **Linux VPS** catalog. Selecting Windows Server in that form triggers a **Rs. 46,510 / year license surcharge** on top of the base plan (Rs. 113,590), ballooning your cart to **Rs. 160,100 / year** for a server with only **2 Cores and 4 GB RAM** running an older Windows 2019 build.

Cart Parameter	Value in Current Cart Link	Impact on EventLand Application
Package & Group	VPS2 (Group 1026: Linux Hosting)	Generic Linux VM pool. Windows is treated as a premium third-party addon.
Hardware Specs	2 vCPU Cores • 4 GB RAM • 60 GB SSD	High Risk 4 GB RAM will crash with Windows Server 2022 + MSSQL.
Selected OS Addon	Windows 2019 Standard R2 (+Rs. 46,510)	Outdated Windows 2019 edition; incurs massive unnecessary licensing surcharge.
Total Cart Due Today	Rs. 160,100 PKR / year	Extremely inefficient: For this exact amount, HosterPK offers 8 GB RAM & 4 Cores natively!

2. Architectural Sizing: Why 4 GB Fails & 8 GB Excels on Windows

EventLand is a concurrent event ticketing engine featuring real-time seat holds via SignalR WebSockets, background booking expiry workers, automated image compression, and an MSSQL relational database. Deploying both backend and frontend on a single Windows Server requires realistic memory planning:

Stack Component	Technology	Idle / Base RAM	Active Spike Load
Operating System	Windows Server 2022 (Desktop/RDP)	~2,200 MB	~2,500 MB (with active RDP session)
Database Server	Microsoft SQL Server 2022 Express	~1,500 MB	~2,000 MB (buffer cache for seating/holds)
Backend API & Hub	.NET 10 Web API + SignalR Hub	~350 MB	~600 MB (concurrent WebSocket holds & auth)
Cache Engine	Redis / Memurai on Windows	~120 MB	~200 MB (atomic 30-min seat reservation keys)
Frontend Web App	React 18 + Vite SPA on IIS	~50 MB	~100 MB (static HTTP/2 + Brotli compression)
TOTAL BASELINE MEMORY NEEDED		~4,220 MB (4.2 GB)	~5,400 MB (5.4 GB Peak)

✗ 4 GB RAM (Current Link) — **Crash Risk**

Physical RAM is exhausted on boot. Windows initiates aggressive SSD disk thrashing (paging). Results: RDP session freezes, SignalR WebSocket drops, and MSSQL crashes with Out-Of-Memory (OOM) errors during customer checkouts.

✓ 8 GB RAM (WinVPS4) — **Recommended**

Leaves ~2.6 to 3.5 GB of free headroom. MSSQL buffer pool operates at full speed, SignalR broadcasts instantaneous seat hold updates across all users, and Remote Desktop administrative access remains buttery smooth.

3. The True Solution: HosterPK Native Windows VPS (Group ID: 1027)

HosterPK provides a dedicated **WinVPS** catalog (/my/order/main/index/win-vps) where **Windows Server (including Windows Server 2022 64-bit)** is natively included at **NO** extra licensing fee:

Plan	vCPU	RAM	SSD Disk	Bandwidth	Monthly Rate	Annual Cost (1 Year)	Verdict & Compatibility
WinVPS1	1 Core	2 GB	30 GB	2 TB	Rs. 5,000	Rs. 60,160 / yr	Incompatible (Cannot boot MSSQL)
WinVPS2	2 Cores	4 GB	60 GB	4 TB	Rs. 7,780	Rs. 93,540 / yr	High Risk (Insufficient RAM buffer)
WinVPS3	3 Cores	6 GB	90 GB	6 TB	Rs. 10,550	Rs. 126,970 / yr	BUDGET PICK (Saves Rs. 33,130 vs cart)
WinVPS4	4 Cores	8 GB	120 GB	8 TB	Rs. 13,370	Rs. 160,380 / yr	TOP RECOMMENDATION (Exact cart price!)
WinVPS5	5 Cores	10 GB	150 GB	10 TB	Rs. 16,140	Rs. 193,790 / yr	High Concurrency (>1,000 live buyers)
WinVPS6	6 Cores	12 GB	180 GB	12 TB	Rs. 18,930	Rs. 227,200 / yr	Enterprise Scale Multi-Organizer
WinVPS7	7 Cores	14 GB	210 GB	14 TB	Rs. 21,710	Rs. 260,600 / yr	Maximum Resource Tier

4. Head-to-Head: Current Cart vs. Recommended Solution

Here is the direct comparison between what you have open in your browser right now and the recommended Native Windows plans:

Feature / Metric	Current URL Cart (VPS2)	WinVPS3 (Budget Choice)	WinVPS4 (Top Recommended)
Product Catalog	Linux VPS + Windows Addon	Native Windows VPS	Native Windows VPS
Operating System	Windows 2019 (Outdated)	Windows Server 2022 (64-Bit)	Windows Server 2022 (64-Bit)
vCPU Cores	2 Cores	3 Cores (+50% CPU)	4 Cores (2x CPU Power!)
RAM	4 GB (Critical Bottleneck)	6 GB (+50% RAM)	8 GB (2x RAM Capacity!)
SSD Storage	60 GB SSD	90 GB SSD (+50% Space)	120 GB SSD (2x Storage!)
Monthly Bandwidth	4 TB Bandwidth	6 TB Bandwidth	8 TB Bandwidth (2x Bandwidth!)
Base VPS Price	Rs. 113,590 / year	Rs. 126,970 / year	Rs. 160,380 / year
OS License Fee	+Rs. 46,510 / yr (Hidden)	Rs. 0 (Included)	Rs. 0 (Included)
TOTAL ANNUAL COST	Rs. 160,100 / yr	Rs. 126,970 / yr	Rs. 160,380 / yr
Cost vs. Your Cart	Baseline (Zero Gain)	Saves Rs. 33,130 / yr (21% Off)	+Rs. 280 / yr (Identical Cost, 2x Hardware!)

The Winning Verdict for EventLand:

- **Choose WinVPS4 (Rs. 160,380/yr) — [Top Pick]:** For virtually the exact same money (+Rs. 280), you get **double the RAM (8 GB)**, **double the CPU cores (4 Cores)**, and **double the SSD storage (120 GB)**, guaranteeing zero lag during live ticket drops.
- **Choose WinVPS3 (Rs. 126,970/yr) — [Budget Pick]:** If minimizing expenses is your top priority, WinVPS3 provides full compatibility with Windows Server 2022 and MSSQL while **putting Rs. 33,130 back in your pocket**.

5. Complete Annual Software & Licensing Stack (Rs. 0 Extra Outside Server)

Because you already own your domain and will use Microsoft's official free tools, you incur **zero software licensing expenses** outside the server itself:

Item	Specification & Purpose	Cost (PKR)
Cloud VPS Server (1 Year)	HosterPK WinVPS4 (4 Cores • 8 GB RAM • 120 GB SSD • 8 TB BW)	Rs. 160,380
Domain Name	Existing Domain (Already owned by you; mapped via DNS A-Records)	Rs. 0 (Included)
Windows Server OS License	Windows Server 2022 Standard 64-Bit (Included natively on WinVPS)	Rs. 0 (Included)
Database Management System	Microsoft SQL Server 2022 Express (Official Free Microsoft Edition, up to 10 GB DB)	Rs. 0 (Free)
Database Admin Studio	Microsoft SQL Server Management Studio (SSMS 20/21)	Rs. 0 (Free)
Web Server & Reverse Proxy	IIS (Internet Information Services) + ASP.NET Core Module (ANCM) v2	Rs. 0 (Free)
SSL / TLS Security Certificate	Win-ACME (Automated Let's Encrypt SSL with zero-touch 90-day auto-renewal)	Rs. 0 (Free)
TOTAL ESTIMATED ANNUAL INVESTMENT		Rs. 160,380 PKR

6. Step-by-Step Purchase & Deployment Instructions

Phase 1: Ordering on HosterPK Correctly

- 1 Navigate to <https://www.hosterpk.com/my/order/main/index/win-vps> and select **WinVPS4** (or WinVPS3).
- 2 Choose **"I will use my existing domain and update my nameservers"**. Enter your registered domain name.
- 3 Select **Windows Server 2022 (64-Bit)** as your Operating System.
- 4 **Skip all optional addons** (LiteSpeed, CXS scanner, WHMCS, Virtualmin) — they are for PHP/cPanel hosting and not needed.
- 5 Select Term: **1 Year (Rs. 160,380)** or **Monthly (Rs. 13,370)**, and complete checkout.

Phase 2: Deploying Frontend & Backend

- 6 **DNS Setup:** In your domain registrar, add two A Records pointing to your VPS Static IP: @ → VPS_IP and www → VPS_IP.
- 7 **Connect via RDP:** Open Remote Desktop Connection (mstsc), enter VPS IP, username Administrator, and password.
- 8 **Install Runtimes:** Install (a) .NET 10 Windows Hosting Bundle, (b) SQL Server 2022 Express & SSMS, (c) Memurai/Redis.
- 9 **Deploy Application:** Place compiled React SPA in C:\inetpub\wwwroot\eventland and .NET API in C:\inetpub\eventland-api. Execute API once to run migration 20260909105956_InitialCreate.
- 10 **Bind SSL:** Run **Win-ACME** command line, select your IIS site, and Let's Encrypt will bind automated HTTPS with zero maintenance.
